

Node.js Goes Mainstream in the Enterprise

THE NUMBER OF NODE PROFESSIONALS IS GROWING FAST!

There are...
470
GROUPS

and over

123,000
MEMBERS

who participate in Node Meetups worldwide.

There are over
100,000

LinkedIn members who have listed Node as a skill.

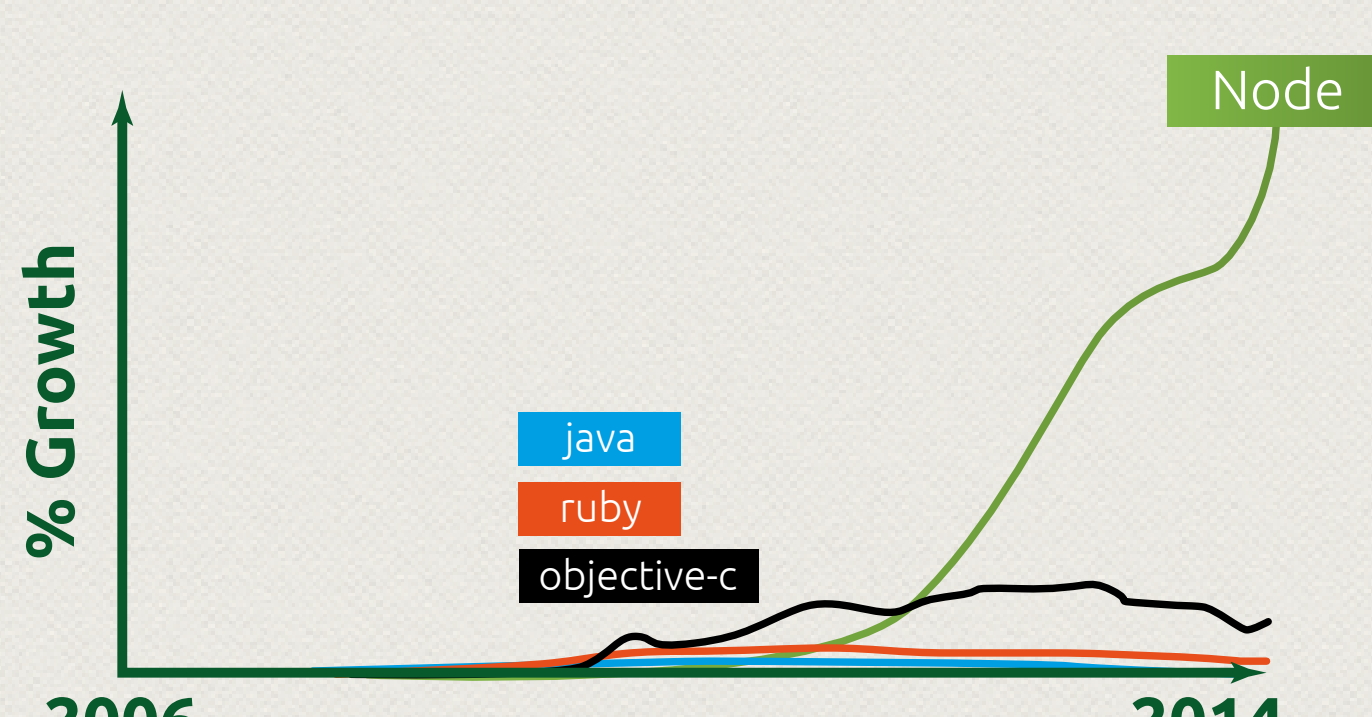

npm download volume is greater during the workweek

More Node development is happening on company time vs personal time.

According to indeed.com Node jobs are growing faster than other languages.

NODE IS ENTERPRISE OPEN SOURCE

Big companies that rely on open source projects to run business critical systems have historically pushed for open governance and transparency. In 2015, Node became a part of the Linux Foundation. A few of the foundation's board members include:

IBM

Microsoft

intel

StrongLoop

PayPal

NETFLIX

NODE IS IN PRODUCTION AT BIG COMPANIES

Big companies have moved from experimenting with Node to deploying it into production. Companies like...

WHOLE FOODS MARKET

Bank of America Merrill Lynch

STAPLES

TARGET

BEST BUY

Cigna

Bloomberg

Alibaba.com

intuit

FANDANGO

PG&E

WELLS FARGO

Symantec

Go Daddy

macy's

DIRECTV

...FOR USE CASES LIKE:

APIs

The "glue" that connects devices and browsers to data and services

Mobile

Backends and full-stack JavaScript hybrid apps

Web

Servers and single-page apps

Internet of Things

Network connected embedded devices and sensors

ENTERPRISE SOFTWARE VENDORS ARE BETTING BIG ON NODE

IBM

Launched NodeRed, an IoT framework plus a JavaScript runtime for IBM platforms.

amazon.com

Announced Lambda, a Node powered event driven computing service for APIs and dynamic applications.

Microsoft

Launched a Node developer center and support for Node in Visual Studio and Azure.

ca technologies

Partnered with StrongLoop to add Node monitoring to their APM.

ORACLE

Launched Nashorn a high-performance JavaScript runtime, enabling Node apps to run on the JVM plus a Node driver for Oracle database.

StrongLoop

Announced Arc, a complete set of tools for developing APIs in Node, from design to production. Maintains the popular Express and LoopBack frameworks.

redhat

Acquired FeedHenry a Node-based mobile backed-as-service.

apigee

Added Node support for API extensibility.

STRONGLOOP HELPS COMPANIES SUCCEED WITH NODE

StrongLoop is helping companies like Staples, GoDaddy, Symantec and CA Technologies succeed with Node. StrongLoop has technical resources, tools and services to help your organization, regardless of where you might be in the API development lifecycle.

StrongLoop
