NODE IS GOOD FOR...

APIs

The "glue" that connects devices and browsers to data and services

Mobile

backends and fullstack JavaScript hybrid apps

Web

servers and single page apps

IoT

(Internet of Things) network connected embedded devices and sensors

What's Coming in Node v0.12

StrongLoop was the primary author of many of the new features in this upcoming release, including:

- Round-robin clustering
- Multiple performance optimizations
- Debugging Clustered Apps with Node Inspector
- Multiple instance support in a single process
- Synchronous API for child processes
