StrongLoop

An IBM Company

Announcing the LoopBack CLI!

Over the last year, as part of the Strongloop-IBM journey, we've integrated the API creation aspects of LoopBack with the API management aspects of IBM's existing solutions. With that, we've made progress on extending the Loopback roadmap. As part of this path, we've now given LoopBack its very own CLI.

Announcing LoopBack 3.0 GA

Last month we announced availability of LoopBack 3.0 for general availability.

It has been a long ride since the last major release of LoopBack (version 2.0), announced more than two years ago. In that time, we have added over 90 new features, StrongLoop was acquired by IBM, the LoopBack team grew by 10 more developers, and we opened the documentation to your contributions.

Teaser: Upcoming LoopBack

and API Connect Webinars

We wanted to give you advanced notice about some upcoming webinars. In coming months we will look at "**Customizing Loopback - Integrating More Modules**", "**Combining Open Whisk, OpenAPI and API Connect to build powerful APIs**", and "**LoopBack, MongoDB, and Continuous Integration**". We will be opening up registration in the coming weeks, so be sure to visit our StrongBlog and Events page for the latest updates and news.
