# StrongLoop
An IBM Company

StrongLoop has been Acquired by IBM

Together we'll create a path for developers to rapidly build and deliver APIs for mobile, IoT and web apps!

Read more about what the acquisition means to you and the communities StrongLoop participates in...

- **Customers and Partners** by CEO, Juan Carlos Soto
- **Node Community** by CPO, Issac Roth
- **LoopBack and Express Communities** by CTO, Al Tsang
- **The official Press Release**

Check out this **demo** by CTO Al Tsang on how to get StrongLoop up and running on IBM's **Bluemix Cloud** in just a few clicks!

Professional Services for Node

You are in good company when you take advantage of StrongLoop's expertise in Node.js and API development. Talk to us about one of our services packages or a custom solution that addresses your particular needs.

- **StrongLoop Jumpstart:** Provides knowledge transfer to development and DevOps teams while mentoring them in the delivery of their first Node API using the StrongLoop API Platform.
- **StrongLoop Foundation:** Create a repeatable, reliable Node API delivery machine. This includes helping project teams design a process to allow for the maximum code reuse across multiple applications.
- **StrongLoop CritSit:** Finding memory leaks in your Node apps is hard and StrongLoop is ready to help! During this week-long

engagement and using our proprietary tools, our team will work alongside you engineers to instrument, collect and diagnose the problems with your Node App.
